Distinct roles for the cell adhesion molecule Contactin2 in the development and function of neural circuits in zebrafish

Suman Gurung, Emilia Asante, Devynn Hummel, Ashley Williams, Oren Feldman-Schultz, Mary C. Halloran, Vinoth Sittaramane, Anand Chandrasekhar

PII: S0925-4773(18)30082-0
DOI: doi:[10.1016/j.mod.2018.05.005](https://doi.org/10.1016/j.mod.2018.05.005)
Reference: MOD 3504
To appear in: *Mechanisms of Development*
Received date: 21 November 2017
Revised date: 2 April 2018
Accepted date: 9 May 2018

Please cite this article as: Suman Gurung, Emilia Asante, Devynn Hummel, Ashley Williams, Oren Feldman-Schultz, Mary C. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Distinct roles for the cell adhesion molecule Contactin2 in the development and function of neural circuits in zebrafish

Running Title: Distinct roles for Cntn2 adhesion molecule in zebrafish

Keywords: zebrafish; Neuronal Migration; Axon guidance; Facial Branchiomotor

Neuron; nucMLF; Cell adhesion molecule; Cntn2; Vangl2; Morpholino; CRISPR/Cas9
