RXR heterodimers orchestrate transcriptional control of neurogenesis and cell fate specification

Zoltan Simandi, Attila Horvath, Ixchelt Cuaranta-Monroy, Sascha Sauer, Jean-Francois Deleuze, Laszlo Nagy

PII: S0303-7207(17)30413-6

DOI: [10.1016/j.mce.2017.07.033](https://doi.org/10.1016/j.mce.2017.07.033)

Reference: MCE 10032

To appear in: *Molecular and Cellular Endocrinology*

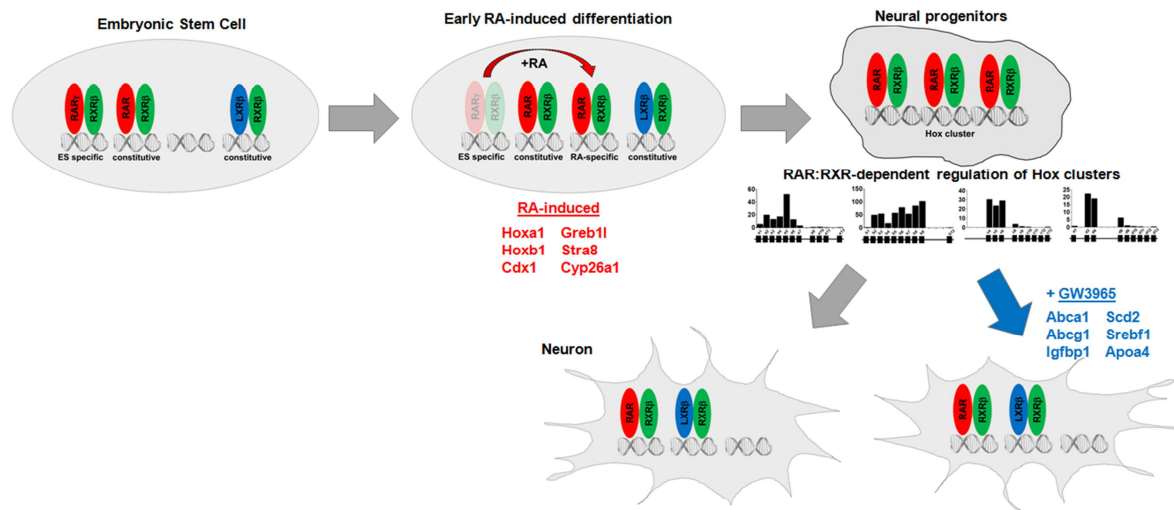

Received Date: 20 March 2017

Revised Date: 20 July 2017

Accepted Date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
