

Accepted Manuscript

SIRT1 is a transcriptional enhancer of the glucocorticoid receptor acting independently to its deacetylase activity

Shigeru Suzuki, James R. Iben, Steven L. Coon, Tomoshige Kino

PII: S0303-7207(17)30497-5

DOI: [10.1016/j.mce.2017.09.012](https://doi.org/10.1016/j.mce.2017.09.012)

Reference: MCE 10072

To appear in: *Molecular and Cellular Endocrinology*

Received Date: 30 May 2017

Revised Date: 10 September 2017

Accepted Date: 13 September 2017

Please cite this article as: Suzuki, S., Iben, J.R., Coon, S.L., Kino, T., SIRT1 is a transcriptional enhancer of the glucocorticoid receptor acting independently to its deacetylase activity, *Molecular and Cellular Endocrinology* (2017), doi: 10.1016/j.mce.2017.09.012.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

SIRT1 is a transcriptional enhancer of the glucocorticoid receptor acting independently to its deacetylase activity

Shigeru Suzuki^{1,2}, James R. Iben³, Steven L. Coon³ and Tomoshige Kino^{1,4,*}
