Partial loss of ATP13A2 causes selective gliosis independent of robust lipofuscinosis

Sruti Rayaprolu, Yasin B. Seven, John Howard, Colin Duffy, Marcelle Altshuler, Christina Moloney, Benoit I. Giasson, Jada Lewis

PII: S1044-7431(18)30098-8
DOI: [doi:10.1016/j.mcn.2018.05.009](https://doi.org/10.1016/j.mcn.2018.05.009)
Reference: YMCNE 3321
To appear in: *Molecular and Cellular Neuroscience*
Received date: 23 March 2018
Revised date: 25 May 2018
Accepted date: 30 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
