

## Accepted Manuscript

Sex-dependent co-occurrence of hypoxia and  $\beta$ -amyloid plaques in hippocampus and entorhinal cortex is reversed by long-term treatment with ubiquinol and ascorbic acid in the 3 $\times$ Tg-AD mouse model of Alzheimer's disease

Javier Frontiñan-Rubio, Francisco J. Sancho-Bielsa, Juan R. Peinado, Frank M. LaFerla, Lydia Giménez-Llort, Mario Durán-Prado, Francisco J. Alcain

PII: S1044-7431(17)30154-9  
DOI: doi:[10.1016/j.mcn.2018.06.005](https://doi.org/10.1016/j.mcn.2018.06.005)  
Reference: YMCNE 3326

To appear in: *Molecular and Cellular Neuroscience*

Received date: 15 May 2017  
Revised date: 18 June 2018  
Accepted date: 19 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Target Journal: Molecular and Cellular Neuroscience

**Sex-dependent co-occurrence of hypoxia and  $\beta$ -amyloid plaques in hippocampus and entorhinal cortex is reversed by long-term treatment with ubiquinol and ascorbic acid in the 3xTg-AD mouse model of Alzheimer's disease**
