Please cite this article as: Xiang Yin, Shuyu Wang, Yan Qi, Xudong Wang, Hongquan Jiang, Tianhang Wang, Yueqing Yang, Ying Wang, Chunting Zhang, Honglin Feng , Astrocyte elevated gene-1 is a novel regulator of astrogliosis and excitatory amino acid transporter-2 via interplaying with nuclear factor- κ B signaling in astrocytes from amyotrophic lateral sclerosis mouse model with hSOD1G93A mutation. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Ymcne*(2017), doi:[10.1016/j.mcn.2018.05.004](https://doi.org/10.1016/j.mcn.2018.05.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Astrocyte elevated gene-1 is a novel regulator of astrogliosis and excitatory amino acid transporter-2 via interplaying with nuclear factor- κ B signaling in astrocytes from Amyotrophic lateral sclerosis mouse model with hSOD1^{G93A} mutation.
