Differential CaMKII regulation by voltage-gated calcium channels in the striatum

Johanna G. Pasek, Xiaohan Wang, Roger J. Colbran

PII: S1044-7431(15)30010-5
DOI: doi: [10.1016/j.mcn.2015.08.003](https://doi.org/10.1016/j.mcn.2015.08.003)
Reference: YMCNE 3014

To appear in: *Molecular and Cellular Neuroscience*

Received date: 10 March 2015
Revised date: 6 July 2015
Accepted date: 3 August 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Differential CaMKII regulation by voltage-gated calcium channels in the striatum

Authors:

Johanna G. Pasek¹, Xiaohan Wang^{2,3}, and Roger J. Colbran^{1,2,4*}

1 Department of Molecular Physiology and Biophysics, 2 Vanderbilt Brain Institute, 3 Vanderbilt International Scholar Program, and 4 Vanderbilt Kennedy Center, Vanderbilt University Medical Center, Nashville, TN

* Address correspondence to Roger J. Colbran at: Rm. 702 Light Hall, Vanderbilt University School of Medicine, Nashville, TN 37232-0615 (Tel: 615-936-1630. Fax: 615-322-7236. Email: roger.colbran@vanderbilt.edu)

Keywords: synaptic plasticity; L-type calcium channels; T-type calcium channels; medium spiny neuron; subcellular fractionation.

Abbreviations: α -amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid receptor (AMPA); calcium/calmodulin-dependent protein kinase II (CaMKII); L-type calcium channel (LTCC); medium spiny neuron (MSN); R-type calcium channel (RTCC); T-type calcium channel (TTCC); Voltage-gated calcium channel (VGCC).
