Mass spectrometry analyses of normal and polyglutamine expanded ataxin-3 reveal novel interaction partners involved in mitochondrial function

Line V. Kristensen, Felix S. Oppermann, Matthias J. Rauen, Karina Fog, Thorsten Schmidt, Jana Schmidt, Tina Harmuth, Rasmus Hartmann-Petersen, Kenneth Thirstrup

PII: S0197-0186(17)30176-6

DOI: [10.1016/j.neuint.2017.10.013](https://doi.org/10.1016/j.neuint.2017.10.013)

Reference: NCI 4155

To appear in: *Neurochemistry International*

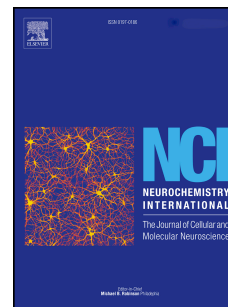

Received Date: 9 April 2017

Revised Date: 1 September 2017

Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Mass spectrometry analyses of normal and polyglutamine expanded ataxin-3**  
2 **reveal novel interaction partners involved in mitochondrial function**
