Title: Serotonin-2C antagonism augments the effect of citalopram on serotonin and dopamine levels in the ventral tegmental area and nucleus accumbens

Author: Anniek KD Visser, Jelle Kleijn, Martijn HJR van Faassen, Eliyahu Dremencov, Gunnar Flik, Ido P Kema, Johan A Den Boer, Aren van Waarde, Rudi AJO Dierckx, Fokko J Bosker

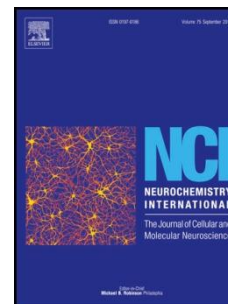

PII: S0197-0186(14)00253-8
DOI: <http://dx.doi.org/doi: 10.1016/j.neuint.2014.12.006>
Reference: NCI 3662

To appear in: *Neurochemistry International*

Received date: 25-9-2014
Revised date: 17-11-2014
Accepted date: 18-12-2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Serotonin-2C antagonism augments the effect of citalopram on serotonin and dopamine levels in the ventral tegmental area and nucleus accumbens
