Rearing finishing pigs with intact tails: do they benefit from an enriched environment?

Anneleen Bulens, Msc, Sanne Van Beirendonck, Jos Van Thielen, Nadine Buys, Bert Driessen

PII: S1558-7878(17)30247-2

DOI: [10.1016/j.jveb.2017.12.003](https://doi.org/10.1016/j.jveb.2017.12.003)

Reference: JVEB 1107

To appear in: *Journal of Veterinary Behavior*

Received Date: 9 August 2016

Revised Date: 2 November 2017

Accepted Date: 6 December 2017

Please cite this article as: Bulens, A., Van Beirendonck, S., Van Thielen, J., Buys, N., Driessen, B., Rearing finishing pigs with intact tails: do they benefit from an enriched environment?, *Journal of Veterinary Behavior* (2018), doi: 10.1016/j.jveb.2017.12.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
