Title: Review: protein value of distillers dried grains with solubles (DDGS) in animal nutrition as affected by the ethanol production process

Authors: C. Böttger, K.-H. Südekum

PII: S0377-8401(18)30576-5
DOI: <https://doi.org/10.1016/j.anifeedsci.2018.07.018>
Reference: ANIFEE 14044

To appear in: *Animal Feed Science and Technology*

Received date: 28-4-2018
Revised date: 23-6-2018
Accepted date: 31-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Review: protein value of distillers dried grains with solubles (DDGS) in animal nutrition
as affected by the ethanol production process**

Highlights

- Protein value of DDGS is predetermined by the raw material grain.
- Protein value of DDGS is affected by the production process.
- Yeast protein contributes to DDGS protein.
- Systematic investigation of DDGS quality is impeded by the complex nature of the production process.
