Title: Variation in the solubilization of crude protein in wheat straw by different white-rot fungi

Authors: Nazri Nayan, Anton S.M. Sonnenberg, Wouter H. Hendriks, John W. Cone

PII: S0377-8401(18)30236-0
DOI: <https://doi.org/10.1016/j.anifeedsci.2018.06.009>
Reference: ANIFEE 14021

To appear in: *Animal Feed Science and Technology*

Received date: 20-2-2018
Revised date: 21-6-2018
Accepted date: 22-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Variation in the solubilization of crude protein in wheat straw by different white-rot fungi

Highlights

- White-rot fungi are able to liberate lignin bound protein
- Fungal-treated wheat straw shows an increase in soluble protein
- The increase in protein fermentation is species specific
- Arginine and lysine are increased by fungal treatment
