Title: Nitrogen-corrected apparent metabolizable energy value of corn distillers dried grains with solubles for laying hens

Authors: H.Y. Wang, S.P. Bai, X.M. Ding, J.P. Wang, Q.F. Zeng, Z.W. Su, Y. Xuan, K.Y. Zhang

PII: S0377-8401(17)31307-X
DOI: <https://doi.org/10.1016/j.anifeedsci.2018.02.002>
Reference: ANIFEE 13942

To appear in: *Animal Feed Science and Technology*

Received date: 25-10-2017
Revised date: 2-2-2018
Accepted date: 2-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nitrogen-corrected apparent metabolizable energy value of corn distillers dried grains with solubles for laying hens

Highlights

- To determine the nutrient composition and AME_n content of corn distillers dried grains with solubles (DDGS).
- To develop prediction equations for the AME_n of DDGS in laying hens with its chemical compositions.
- To seek an alternative ingredient for laying hen in this paper.
