This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Exposure to low or high light intensity affects pituitary-testicular activity in the fish *Oreochromis mossambicus***

Prashanth Konkal and C.B. Ganesh \*

Department of Studies in Zoology, Karnatak University, Dharwad - 580 003,  
Karnataka state, India

**Running head title:** Effect of light intensity on pituitary- testis axis in fish

**Key words:** Light intensity; *Oreochromis mossambicus*; Androgen receptors; Luteinizing hormone; Spermatogenesis; Sertoli cells.
