Effect of water oxygen level on performance of diploid and triploid Atlantic salmon post-smolts reared at high temperature

Tom Johnny Hansen, Rolf Erik Olsen, Lars Stien, Frode Oppedal, Thomas Torgersen, Olav Breck, Mette Remen, Tone Vågseth, Per Gunnar Fjelldal

PII: S0044-8486(14)00525-0
DOI: doi: [10.1016/j.aquaculture.2014.10.017](https://doi.org/10.1016/j.aquaculture.2014.10.017)
Reference: AQUA 631391

To appear in: *Aquaculture*

Received date: 20 March 2014
Revised date: 7 October 2014
Accepted date: 9 October 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of water oxygen level on performance of diploid and triploid Atlantic salmon post-smolts reared at high temperature
