Waterborne Cd²⁺ weakens the immune responses of blood clam through impacting Ca²⁺ signaling and Ca²⁺ related apoptosis pathways

Wei Shi, Xiaofan Guan, Yu Han, Cheng Guo, Jiahuan Rong, Wenhao Su, Shanjie Zha, Yichen Wang, Guangxu Liu

PII: S1050-4648(18)30179-7

DOI: [10.1016/j.fsi.2018.03.055](https://doi.org/10.1016/j.fsi.2018.03.055)

Reference: YFSIM 5210

To appear in: *Fish and Shellfish Immunology*

Received Date: 25 December 2017

Revised Date: 21 March 2018

Accepted Date: 29 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Title:** Waterborne Cd²⁺ weakens the immune responses of blood clam through
2 impacting Ca²⁺ signaling and Ca²⁺ related apoptosis pathways

3 **List of authors:** Wei Shi¹; Xiaofan Guan¹; Yu Han¹; Cheng Guo¹; Jiahuan Rong¹;
4 Wenhao Su¹; Shanjie Zha¹; Yichen Wang¹; Guangxu Liu^{1,*}

5 **Institute or laboratory of origin:**

6 ¹College of Animal Sciences, Zhejiang University, Hangzhou, P.R. China

7 ***Author for correspondence:**

8 Guangxu Liu, e-mail: guangxu_liu@zju.edu.cn

9 Mobile: +86-13216156202
