The effect of protein-to-alginate ratio on in vitro gastric digestion of nanoparticulated whey protein

Glykeria Koutina, Colin A. Ray, Rene Lametsch, Richard Ipsen

PII: S0958-6946(17)30192-9

DOI: [10.1016/j.idairyj.2017.09.001](https://doi.org/10.1016/j.idairyj.2017.09.001)

Reference: INDA 4214

To appear in: *International Dairy Journal*

Received Date: 17 May 2017

Revised Date: 1 September 2017

Accepted Date: 1 September 2017

Please cite this article as: Koutina, G., Ray, C.A., Lametsch, R., Ipsen, R., The effect of protein-to-alginate ratio on in vitro gastric digestion of nanoparticulated whey protein, *International Dairy Journal* (2017), doi: 10.1016/j.idairyj.2017.09.001.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The effect of protein-to-alginate ratio on in vitro gastric digestion of nanoparticulated whey protein
