This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The brain is the most affected organ in light piglets at birth.
- Performance until slaughter is not influenced by birth weight in piglets weighing at birth above 1.50 kilograms.
- The carcass traits and meat quality are not influenced by the weight of the piglets at birth.
