This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Performance and meat quality were examined in different cattle breeds.
- The lowest feeding efficiency measured by RFI was observed in Holstein.
- Sensory attributes were rated higher in Aberdeen Angus than in the other breeds.
- Clear differences among breeds varying in age of maturity were revealed.
