This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Declaration on human and animal rights

The work did not involve any experiment on humans. As for the animals involved, all slaughtered carcasses were transported to Animalia's pilot plant after ordinary slaughtering at one of Nortura's commercial abattoirs. Thus the work did not involve any extra stress or harm to animals involved.

Declaration of interest

None of the authors have direct economical interests in publication of the submitted manuscript. However, all authors are affiliated (employed) with Animalia. Animalia is in turn part of the Norwegian farmers cooperative, Nortura SA. Animalia owns the pilot plant where the commercial cutting pattern (CCP) described in the manuscript is conducted. Publication of this paper would strengthen Animalia's position as a provider of this service (CCP).
