Melt-electrospinning as a method to improve the dissolution and physical stability of a poorly water-soluble drug

Kristian Semjonov, Andres Lust, Karin Kogermann, Ivo Laidmäe, Sirkka Liisa Maunu, Sami-Pekka Hirvonen, Jouko Yliruusi, Gunnar Nurk, Enn Lust, Jyrki Heinämäki

PII: S0928-0987(18)30260-4

DOI: doi:[10.1016/j.ejps.2018.06.004](https://doi.org/10.1016/j.ejps.2018.06.004)

Reference: PHASCI 4546

To appear in: *European Journal of Pharmaceutical Sciences*

Received date: 16 March 2018

Revised date: 1 June 2018

Accepted date: 4 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Melt-electrospinning as a method to improve the dissolution and physical stability of a poorly water-soluble drug
