Effect of vinylpyrrolidone polymers on the solubility and supersaturation of drugs; a study using the Cheqsol method

Elisenda Fornells, Elisabet Fuguet, Meritxell Mañé, Rebeca Ruiz, Karl Box, Elisabeth Bosch, Clara Ràfols

PII: S0928-0987(18)30102-7

DOI: doi:[10.1016/j.ejps.2018.02.025](https://doi.org/10.1016/j.ejps.2018.02.025)

Reference: PHASCI 4422

To appear in: *European Journal of Pharmaceutical Sciences*

Received date: 4 December 2017

Revised date: 21 February 2018

Accepted date: 22 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of vinylpyrrolidone polymers on the solubility and supersaturation of drugs; a study using the Cheqsol method
