Very fast dissolving acid carboxymethylcellulose-rifampicin matrix: Development and solid-state characterization

Laura C. Luciani-Giacobbe, María V. Ramírez-Rigo, Yamila Garro-Linck, Gustavo A. Monti, Ruben H. Manzo, María E. Olivera

PII: S0928-0987(16)30436-5
DOI: doi:[10.1016/j.ejps.2016.10.013](https://doi.org/10.1016/j.ejps.2016.10.013)
Reference: PHASCI 3759

To appear in:

Received date: 8 May 2016
Revised date: 23 September 2016
Accepted date: 5 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Very fast dissolving acid carboxymethylcellulose- rifampicin matrix: development and solid-state characterization
