Eplerenone nanoemulsions for treatment of hypertension. Part I: Experimental design for optimization of formulations and physical characterization

Samet Özdemir, Burak Çelik, Ebru Türköz Acar, Güleğül Duman, Melike Üner

PII: S1773-2247(17)31009-2

DOI: [10.1016/j.jddst.2018.03.011](https://doi.org/10.1016/j.jddst.2018.03.011)

Reference: JDDST 604

To appear in: *Journal of Drug Delivery Science and Technology*

Received Date: 25 November 2017

Revised Date: 25 February 2018

Accepted Date: 8 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

design of experiments
(D-optimal design)

nanoemulsion

SEM

DLS

characterization

in vitro release (dialysis bags)
