Technical challenges in obtaining an optimized powder/DPI combination for inhalation delivery of a bi-component generic drug

Arkadiusz Hejduk, Agnieszka Urbańska, Andrzej Osiński, Piotr Łukaszewicz, Maciej Domański, Tomasz R. Sosnowski

PII: S1773-2247(17)30603-2

DOI: [10.1016/j.jddst.2018.01.019](https://doi.org/10.1016/j.jddst.2018.01.019)

Reference: JDDST 572

To appear in: *Journal of Drug Delivery Science and Technology*

Received Date: 24 July 2017

Revised Date: 12 January 2018

Accepted Date: 24 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TF1:
technical factor 1 = powder formulation

TF2:
technical factor 2 = inhalation device

HF:
human factor = patient
