This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A double-blinded, randomized, placebo controlled, parallel study of pollen pistil extract (Sèrèlys) on women reporting irritability as predominant PMS symptom**

**Principal investigator:** Kaj Winther, MD, DMSci

Department of Nutrition, Sports and Exercise, University of Copenhagen, Denmark

Joan Campbell-Tofte, PhD

Gaudeo-Ik A/s, Gentofte, Denmark

Alzahraa M. Motawei, PhD

Food Industries Department, Faculty of Agriculture, Mansoura University, Mansoura, Egypt

Frank Pedersen, MD

Skeiby University Hospital, Department of Woman and Child, University of Aarhus, Denmark

Signe Barfod Roos, MD

Urological Department, Hospital Lillebaelt, Vejle, Denmark

Anne Sophie Vinther Hansen, M.Sc., MBA

Section for Sustainable Biotechnology, Department of Chemistry and BioScience, University of Aalborg, Denmark

Gitte Gleerup Fornitz, MD, DMSci

Medical Center, Amager Hospital, Copenhagen, Denmark

Marianne Killi, MD

General Practice, Fartein Valens vej, Kolbotn, Norway

Gerhardt Gerhardsen, MD

General Practice, Fartein Valens vej, Kolbotn, Norway

The study was funded by a grant from Natumin Pharma AB, Huskvarna, Sweden.

The protocol is registered at the Ethical Committee, Funen and Southern Jutland, Denmark.
