Effect of freeze-dryer design on heat transfer variability investigated using a 3D mathematical model

B. Scutellà, E. Bourlés, A. Plana-Fattori, F. Fonseca, D. Flick, I.C. Trelea, S. Passot

PII: S0022-3549(18)30204-1

DOI: [10.1016/j.xphs.2018.04.002](https://doi.org/10.1016/j.xphs.2018.04.002)

Reference: XPHS 1126

To appear in: *Journal of Pharmaceutical Sciences*

Received Date: 1 December 2017

Revised Date: 31 March 2018

Accepted Date: 3 April 2018

Please cite this article as: Scutellà B, Bourlés E, Plana-Fattori A, Fonseca F, Flick D, Trelea IC, Passot S, Effect of freeze-dryer design on heat transfer variability investigated using a 3D mathematical model, *Journal of Pharmaceutical Sciences* (2018), doi: 10.1016/j.xphs.2018.04.002.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Effect of freeze-dryer design on heat transfer variability investigated using**
2 **a 3D mathematical model**
