Deep Convolutional Neural Network Analysis of Flow Imaging Microscopy Data to Classify Subvisible Particles in Protein Formulations

Christopher P. Calderon, Austin L. Daniels, Theodore W. Randolph

PII: S0022-3549(17)30878-X

DOI: [10.1016/j.xphs.2017.12.008](https://doi.org/10.1016/j.xphs.2017.12.008)

Reference: XPHS 1023

To appear in: *Journal of Pharmaceutical Sciences*

Received Date: 2 October 2017

Revised Date: 27 November 2017

Accepted Date: 7 December 2017

Please cite this article as: Calderon CP, Daniels AL, Randolph TW, Deep Convolutional Neural Network Analysis of Flow Imaging Microscopy Data to Classify Subvisible Particles in Protein Formulations, *Journal of Pharmaceutical Sciences* (2018), doi: 10.1016/j.xphs.2017.12.008.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Deep Convolutional Neural Network Analysis of Flow Imaging Microscopy Data to Classify Subvisible Particles in Protein Formulations
