A physiologically-based pharmacokinetic modeling approach to predict drug-drug interactions of buprenorphine after subcutaneous administration of CAM2038 with perpetrators of CYP3A4

Tao Liu, Ph.D., Jogarao V.S. Gobburu, Ph.D. MBA FCP

PII: S0022-3549(17)30774-8

DOI: [10.1016/j.xphs.2017.10.035](https://doi.org/10.1016/j.xphs.2017.10.035)

Reference: XPHS 984

To appear in: *Journal of Pharmaceutical Sciences*

Received Date: 9 August 2017

Revised Date: 23 October 2017

Accepted Date: 24 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Target Journal: The journal of pharmaceutical sciences

Title: A physiologically-based pharmacokinetic modeling approach to predict drug-drug interactions of buprenorphine after subcutaneous administration of CAM2038 with perpetrators of CYP3A4

Authors: Tao Liu Ph.D. and Jogarao V.S. Gobburu Ph.D. MBA FCP

Affiliations: Center for Translational Medicine, School of Pharmacy, University of Maryland Baltimore

Corresponding Author: Professor Jogarao V.S. Gobburu Ph.D. MBA FCP

Center for Translational Medicine, School of Pharmacy, University of Maryland Baltimore

Office: 410 706 5907

Fax: 410 706 6580

Email: jgobburu@rx.umaryland.edu

Number of Figures: 6 (1 in supplementary material)

Number of tables: 6 (4 in supplementary material)

Number of words: 3643

Number of references: 31

Keywords: buprenorphine, drug-drug interaction, physiologically based pharmacokinetics, ketoconazole, rifampin
