Aerosol production by vibrating-membrane technology: Analysis of the electrolyte effect on generated droplet size and nebulizer output rate

Moritz Beck-Broichsitter

PII: S0022-3549(17)30332-5

DOI: [10.1016/j.xphs.2017.04.062](https://doi.org/10.1016/j.xphs.2017.04.062)

Reference: XPHS 785

To appear in: *Journal of Pharmaceutical Sciences*

Received Date: 27 December 2016

Revised Date: 6 April 2017

Accepted Date: 24 April 2017

Please cite this article as: Beck-Broichsitter M, Aerosol production by vibrating-membrane technology: Analysis of the electrolyte effect on generated droplet size and nebulizer output rate, *Journal of Pharmaceutical Sciences* (2017), doi: 10.1016/j.xphs.2017.04.062.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Aerosol production by vibrating-membrane technology: Analysis of the electrolyte effect on generated droplet size and nebulizer output rate

*Moritz Beck-Broichsitter**

Medical Clinic II, Department of Internal Medicine, Justus-Liebig-Universität, Giessen, Germany
Present address: Chemical and Pharmaceutical Development, Bayer Pharma AG, Wuppertal, Germany

* **Corresponding author:** Moritz Beck-Broichsitter, PhD; Chemical and Pharmaceutical Development, Bayer Pharma AG, Friedrich-Ebert-Strasse 217-333, D-42117 Wuppertal, Germany
Tel.: 0049 214 3000; Fax: 0049 202 36 3867
E-mail: moritz.beck-broichsitter@bayer.com

Conflict of interest: The author discloses that no conflicting interests associated with the manuscript exist.

Submission declaration: The author certifies that this manuscript, or any part of it, has not been published and will not be submitted elsewhere for publication while being considered by the *Journal of Pharmaceutical Sciences*.

Role of funding source: The “Universitätsklinikum Giessen und Marburg” (1/2012 GI) provided financial support for the conduct of the research. The funding source had no involvement in the study design; in the collection, analysis and interpretation of data; in the writing of the report; or in the decision to submit the article for publication.

Word count: 2635 (main text + Figure and Table legends)

Figure and Table count: 4
