Development of a predictive model for the stabilizer concentration estimation in microreservoir transdermal drug delivery systems (MTDDS) using lipophilic pressure sensitive adhesives as matrix/carrier

Clémence Chenevas-Paule, Hans-Michael Wolff, Mark Ashton, Martin Schubert, Kalliopi Dodou

PII: S0022-3549(17)30065-5

DOI: [10.1016/j.xphs.2017.01.031](https://doi.org/10.1016/j.xphs.2017.01.031)

Reference: XPHS 639

To appear in: *Journal of Pharmaceutical Sciences*

Received Date: 12 October 2016

Revised Date: 3 January 2017

Accepted Date: 24 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

GRAPHICAL ABSTRACT

Predicted value of minimum stable molar VP:drug ratio in microreservoir silicone films.
