

## Accepted Manuscript

Neuroprotective Potential of High-Dose Biotin

Mark F. McCarty, James J. DiNicolantonio

PII: S0306-9877(17)30843-5

DOI: <https://doi.org/10.1016/j.mehy.2017.10.012>

Reference: YMEHY 8707

To appear in: *Medical Hypotheses*

Received Date: 8 August 2017

Accepted Date: 13 October 2017

Please cite this article as: M.F. McCarty, J.J. DiNicolantonio, Neuroprotective Potential of High-Dose Biotin, *Medical Hypotheses* (2017), doi: <https://doi.org/10.1016/j.mehy.2017.10.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Neuroprotective Potential of High-Dose Biotin
