Pramipexole and Fingolimod exert neuroprotection in a mouse model of Parkinson's disease by activation of sphingosine kinase 1 and Akt kinase'

Joanna Motyl, Łukasz Przykaza, Paweł M. Boguszewski, Piotr Kosson, Joanna B. Strosznajder

PII: S0028-3908(18)30089-3

DOI: [10.1016/j.neuropharm.2018.02.023](https://doi.org/10.1016/j.neuropharm.2018.02.023)

Reference: NP 7091

To appear in: *Neuropharmacology*

Received Date: 20 July 2017

Revised Date: 14 February 2018

Accepted Date: 22 February 2018

Please cite this article as: Motyl, J., Przykaza, Ł., Boguszewski, Paweł.M., Kosson, P., Strosznajder, J.B., Pramipexole and Fingolimod exert neuroprotection in a mouse model of Parkinson's disease by activation of sphingosine kinase 1 and Akt kinase', *Neuropharmacology* (2018), doi: 10.1016/j.neuropharm.2018.02.023.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*'Pramipexole and Fingolimod exert neuroprotection in a mouse model of Parkinson's disease by activation of sphingosine kinase 1 and Akt kinase'*
