This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Enhanced Incentive Motivation in Obesity-Prone Rats is Mediated by NAc Core CP-AMPA Receptors.

Running Head: NAc Core CP-AMPA Receptors Mediate PIT in Obesity-Prone Rats

Authors: Rifka C. Derman¹ and Carrie R. Ferrario^{1,2}

Affiliations: University of Michigan: 1) Department of Pharmacology and 2) Neuroscience Graduate Program

Corresponding Author: Carrie R. Ferrario; ferrario@umich.edu; 1150 W. Medical Center Drive, Department of Pharmacology, MSRB III A200, Ann Arbor, MI 48109 (734) 763-8637

Keywords: addiction, motivation, striatum, AMPA receptor, PIT, glutamate plasticity

Sections: 4

Number of Figures: Figures 5; Tables 0; Supplemental Figures 4
