Venom-derived peptides inhibiting Kir channels: Past, present, and future

Craig A. Doupnik

PII: S0028-3908(17)30329-5

DOI: [10.1016/j.neuropharm.2017.07.011](https://doi.org/10.1016/j.neuropharm.2017.07.011)

Reference: NP 6780

To appear in: *Neuropharmacology*

Received Date: 24 May 2017

Revised Date: 5 July 2017

Accepted Date: 13 July 2017

Please cite this article as: Doupnik, C.A., Venom-derived peptides inhibiting Kir channels: Past, present, and future, *Neuropharmacology* (2017), doi: 10.1016/j.neuropharm.2017.07.011.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Special Issue on 'Venom-derived peptides as pharmacological tools' for *Neuropharmacology*

Venom-derived peptides inhibiting Kir channels: Past, Present, and Future

Craig A. Doupnik¹
