This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Bioactive compound 1,8-Cineole selectively induces G2/M arrest in**
2 **A431 cells through the upregulation of the p53 signaling pathway and**
3 **molecular docking studies**
