Impact of Formulation Excipients on the Thermal, Mechanical, and Electrokinetic Properties of Hydroxypropyl methylcellulose acetate succinate (HPMCAS)

Tanvi M. Deshpande, Anisul Quadir, Sakae Obara, Stephen W. Hoag

PII: S0378-5173(18)30105-4

DOI: <https://doi.org/10.1016/j.ijpharm.2018.02.024>

Reference: IJP 17322

To appear in: *International Journal of Pharmaceutics*

Received Date: 10 November 2017

Revised Date: 4 February 2018

Accepted Date: 15 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Impact of Formulation Excipients on the Thermal, Mechanical, and Electrokinetic
Properties of Hydroxypropyl methylcellulose acetate succinate (HPMCAS)**
