Computational Hydrodynamic Comparison of a Mini Vessel and a USP 2 Dissolution Testing System to Predict the Dynamic Operating Conditions for Similarity of Dissolution Performance

Bing Wang, Gerard Bredael, Piero M. Armenante

PII: S0378-5173(18)30002-4

DOI: <https://doi.org/10.1016/j.ijpharm.2018.01.002>

Reference: IJP 17245

To appear in: *Indian Journal of Pharmacology*

Received Date: 1 August 2017

Revised Date: 29 December 2017

Accepted Date: 1 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Computational Hydrodynamic Comparison of a Mini Vessel and a USP 2 Dissolution Testing System to Predict the Dynamic Operating Conditions for Similarity of Dissolution Performance

Running Head:

Hydrodynamics Comparison of Mini Vessel and USP 2 Systems
