

Accepted Manuscript

Title: Microstructure evaluation of dermally applicable liquid crystals as a function of water content and temperature: can electron paramagnetic resonance provide complementary data?

Authors: Mirjam Gosenca Matjaž, Janez Mravljak, Marija Bešter Rogač, Marjeta Šentjurc, Mirjana Gašperlin, Alenka Zvonar Pobirk

PII: S0378-5173(17)30447-7
DOI: <http://dx.doi.org/doi:10.1016/j.ijpharm.2017.05.035>
Reference: IJP 16683

To appear in: *International Journal of Pharmaceutics*

Received date: 13-1-2017
Revised date: 22-3-2017
Accepted date: 16-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Microstructure evaluation of dermally applicable liquid crystals as a function of water content and temperature: can electron paramagnetic resonance provide complementary data?
