This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Favipiravir (T-705) but not ribavirin is effective against two distinct strains of Crimean-Congo hemorrhagic fever virus in mice

Authors: David W. Hawman^a, Elaine Haddock^a, Kimberly Meade-White^a, Brandi Williamson^a, Patrick W. Hanley^a, Kyle Rosenke^a, Takashi Komeno^b, Yousuke Furuta^b, Brian B. Gowen^c, Heinz Feldmann^a

^a NIH/NIAID, Hamilton, Montana, United States.

^b Research Laboratories, Toyama Chemical, Toyama, Japan.

^c Utah State University, Logan, Utah, United States.

Corresponding author: Heinz Feldmann, feldmannh@niaid.nih.gov

Present Address: 903 S 4th St. Hamilton, MT. 59840

Declarations of interest: Takashi Komeno and Yousuke Furuta are employees of Toyama chemical, the manufacturer of favipiravir.
