

## Accepted Manuscript

Opening of Voltage Dependent Anion Channels Promotes Reactive Oxygen Species Generation, Mitochondrial Dysfunction and Cell Death in Cancer Cells

David N. DeHart, Diana Fang, Kareem Heslop, Li Li, John J. Lemasters, Eduardo N. Maldonado

PII: S0006-2952(17)30734-7  
DOI: <https://doi.org/10.1016/j.bcp.2017.12.022>  
Reference: BCP 12990

To appear in: *Biochemical Pharmacology*

Received Date: 18 September 2017

Accepted Date: 26 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Opening of Voltage Dependent Anion Channels Promotes Reactive Oxygen  
Species Generation, Mitochondrial Dysfunction and Cell Death in Cancer Cells**

The work contained in this manuscript most closely fits into the category of  
“Antibiotics and Chemotherapeutics.” More specifically, the research involves  
chemotherapeutic drug discovery and development.
