Title: Pharmacological and transcriptional inhibition of the G9a histone methyltransferase suppresses proliferation and modulates redox homeostasis in human microvascular endothelial cells

Authors: Martyna Wojtala, Ewa Macierzyńska-Piotrowska, Dorota Rybaczek, Luciano Pirola, Aneta Balcerczyk

PII: S1043-6618(17)30563-7
DOI: <https://doi.org/10.1016/j.phrs.2017.10.014>
Reference: YPHRS 3714

To appear in: *Pharmacological Research*

Received date: 9-5-2017
Revised date: 27-7-2017
Accepted date: 26-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pharmacological and transcriptional inhibition of the G9a histone methyltransferase suppresses proliferation and modulates redox homeostasis in human microvascular endothelial cells
