Modulatory role of conspecific alarm substance on aggression and brain monoamine oxidase activity of two zebrafish populations

Vanessa A. Quadros, Fabiano V. Costa, Julia Canzian, Cristina W. Nogueira, Denis B. Rosemberg

PII: S0278-5846(17)30908-9
DOI: doi:[10.1016/j.pnpbp.2018.03.018](https://doi.org/10.1016/j.pnpbp.2018.03.018)
Reference: PNP 9368

To appear in: *Progress in Neuropsychopharmacology & Biological Psychiatry*

Received date: 6 November 2017
Revised date: 5 February 2018
Accepted date: 22 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modulatory role of conspecific alarm substance on **aggression** and brain
monoamine oxidase activity of two zebrafish populations
