

## Accepted Manuscript

A supplementary functional connectivity microstate attached to the default mode network in depression revealed by resting-state magnetoencephalography

Siqi Zhang, Shui Tian, Mohammad Ridwan Chattun, Hao Tang, Rui Yan, Kun Bi, Zhijian Yao, Qing Lu

PII: S0278-5846(17)30857-6  
DOI: doi:[10.1016/j.pnpbp.2018.01.006](https://doi.org/10.1016/j.pnpbp.2018.01.006)  
Reference: PNP 9317

To appear in: *Progress in Neuropsychopharmacology & Biological Psychiatry*

Received date: 12 October 2017  
Revised date: 8 January 2018  
Accepted date: 8 January 2018

Please cite this article as: Siqi Zhang, Shui Tian, Mohammad Ridwan Chattun, Hao Tang, Rui Yan, Kun Bi, Zhijian Yao, Qing Lu , A supplementary functional connectivity microstate attached to the default mode network in depression revealed by resting-state magnetoencephalography. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A supplementary functional connectivity microstate attached to the default  
mode network in depression revealed by resting-state  
magnetoencephalography**
