Acute hemodynamic effects of intravenous adenosine in patients with associated pulmonary arterial hypertension: Comparison with intravenous epoprostenol

Rosario Rossi, Francesca Coppi, Fabio Sgura, Daniel Monopoli, Giuseppe Boriani

PII: S1094-5539(17)30013-5

DOI: [10.1016/j.pupt.2017.06.005](https://doi.org/10.1016/j.pupt.2017.06.005)

Reference: YPUPT 1639

To appear in: *Pulmonary Pharmacology & Therapeutics*

Received Date: 9 January 2017

Revised Date: 12 June 2017

Accepted Date: 18 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**ACUTE HEMODYNAMIC EFFECTS OF INTRAVENOUS ADENOSINE IN PATIENTS WITH ASSOCIATED PULMONARY ARTERIAL HYPERTENSION: COMPARISON WITH INTRAVENOUS EPOPROSTENOL.**
