Hypoxic challenge of hyperoxic pulmonary artery myocytes increases oxidative stress due to impaired mitochondrial superoxide dismutase activity

Iram Musharaf, Martha Hinton, Man Yi, Shyamala Dakshinamurti

PII: S1094-5539(17)30188-8

DOI: [10.1016/j.pupt.2017.12.003](https://doi.org/10.1016/j.pupt.2017.12.003)

Reference: YPUPT 1688

To appear in: *Pulmonary Pharmacology & Therapeutics*

Received Date: 5 August 2017

Revised Date: 6 December 2017

Accepted Date: 11 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
