Embryoid body test with morphological and molecular endpoints implicates potential developmental toxicity of trans-resveratrol

Iris Q. Kim, Yusuke Marikawa

PII: S0041-008X(18)30316-8
DOI: doi:[10.1016/j.taap.2018.07.006](https://doi.org/10.1016/j.taap.2018.07.006)
Reference: YTAAP 14330

To appear in: *Toxicology and Applied Pharmacology*

Received date: 3 January 2018
Revised date: 27 June 2018
Accepted date: 6 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Embryoid body test with morphological and molecular endpoints implicates potential developmental toxicity of *trans*-resveratrol

Iris Q. Kim and Yusuke Marikawa
