A better approach to in vivo developmental neurotoxicity assessment: Alignment of rodent testing with effects seen in children after neurotoxic exposures

Charles V. Vorhees, Jenna N. Sprowles, Samantha L. Regan, Michael T. Williams

PII: S0041-008X(18)30090-5
DOI: doi:[10.1016/j.taap.2018.03.012](https://doi.org/10.1016/j.taap.2018.03.012)
Reference: YTAAP 14195
To appear in: *Toxicology and Applied Pharmacology*
Received date: 6 November 2017
Revised date: 27 February 2018
Accepted date: 11 March 2018

Williams , A better approach to in vivo developmental neurotoxicity assessment: Alignment of rodent testing with effects seen in children after neurotoxic exposures. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Ytaap(2018), doi:[10.1016/j.taap.2018.03.012](https://doi.org/10.1016/j.taap.2018.03.012)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TAAP-D-17-01046.R1. Special Issue on Neurotoxicology: *Toxicology & Applied Pharmacology*

A better approach to *in vivo* developmental neurotoxicity assessment:
Alignment of rodent testing with effects seen in children after neurotoxic
exposures

Charles V. Vorhees*, Jenna N. Spowles, Samantha L. Regan, and Michael T. Williams
