Noval nitroaromatic compound activates autophagy and apoptosis pathways in HL60 cells

Gabriele Mendes M.C. Perdigão, Marcela Silva Lopes, Lucas Bonfim Marques, Pedro Henrique Dias Moura Prazeres, Kamila de Sousa Gomes, Renata Barbosa de Oliveira, Mauro Cunha Xavier Pinto, Elaine Maria de Souza-Fagundes

PII: S0009-2797(17)30496-9

DOI: [10.1016/j.cbi.2017.12.012](https://doi.org/10.1016/j.cbi.2017.12.012)

Reference: CBI 8169

To appear in: *Chemico-Biological Interactions*

Received Date: 12 May 2017

Revised Date: 15 November 2017

Accepted Date: 5 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

NBCN: N-(2-butanoyloxyethyl)-4-(chloromethyl)-3-nitrobenzamide
