Title: Effect of *in vivo* exposure to ambient fine particles (PM_{2.5}) on the density of dopamine D₂-like receptors and dopamine-induced [³⁵S]-GTPγS binding in rat prefrontal cortex and striatum membranes

Authors: María-de-los-Angeles Andrade-Oliva, Octavio-Gamaliel Aztatzi-Aguilar, Francisco García-Sierra, Andrea De Vizcaya-Ruiz, José-Antonio Arias-Montaña

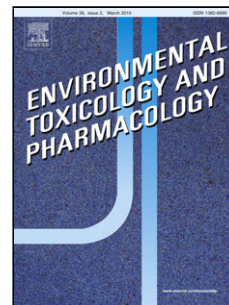

PII: S1382-6689(18)30057-7
DOI: <https://doi.org/10.1016/j.etap.2018.04.001>
Reference: ENVTOX 2989

To appear in: *Environmental Toxicology and Pharmacology*

Received date: 11-1-2018
Revised date: 28-3-2018
Accepted date: 1-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of *in vivo* exposure to ambient fine particles (PM_{2.5}) on the density of dopamine D₂-like receptors and dopamine-induced [³⁵S]-GTPγS binding in rat prefrontal cortex and striatum membranes
